

Luncheon Symposium

MICS Marketplace - Therapy Solutions for the Minimally Invasive Cardiac Surgeon

Friday 8 June 11.45 – 13.00
Crowne Plaza Rome—St. Peter's
Foro Traiano

Description

Join your peers for an interactive luncheon to gain new insight into minimally invasive surgery. Observe presentations from therapy experts as they share tips and tricks about their techniques with the latest technology. Learn how minimally invasive approaches can provide new opportunities for treating heart disease in your practice for the following applications:

- **Cannulation Technique and a Simple Minimally Invasive Approach for Mitral Valve Therapy**
Inderpaul Birdi, MD; Nottingham, UK
- **Minimal Invasive Approach for Combined and Lone AF Therapies**
Professor Belhan Akpınar, MD, PhD; Istanbul, Turkey
- **Minimally Invasive Approach for Aortic Valve Therapy**
Joseph Lamelas, MD; Miami, Florida, USA
- **Minimally Invasive Approach for Multi Vessel CABG Therapy**
Massimo Giovanni Lemma, MD; Milan, Italy

Activities

- Observe video presentations of experts for the different therapies
- Find the many companies offering tools for their techniques
- Take away your own "Solution Packet", holding all relevant information about the therapy, patient selection, procedural steps (on video), and required instruments
- Discover the training opportunities brought to you by the EDGESM education program.

This session offered by Medtronic, Inc.

Lunch symposia sessions are not eligible for CME credits through the ISMICS joint sponsor, the American College of Surgeons.
